CONTENTS

- A. I. Bileush, V. L. Fridrihson, O. I. Kryvonog, V. V. Kryvonog, P. Yu. Romanenko*
Research of construction structures to ensure the stability of landslide-prone
slopes reinforced with geosynthetic materials 111
- A. O. Borysyuk*
Studying the flow in a straight flat rigid channel with two axisymmetric
rigid-wall narrowings of a rectangular shape. Part 1. Theory 126
- V. G. Kuzmenko*
Simulating the separated turbulent flow. Evolution of the energy of coherent
structures end their sizes 149
- P. V. Lukianov*
BVI-noise generation by a wing-shaped blade of a helicopter rotor 176
- B. M. Ostroverh, L. S. Potapenko*
Study of the influence of wind waves on the siltation of the sea approach
channel based on the results of modeling and field observation 191
